

Eksempler på styringer til slangeventiler

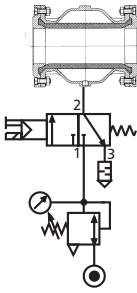

Example of Pinch Valve Controls

- 1) 

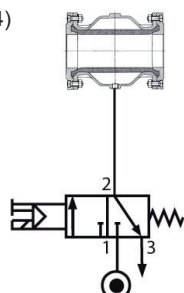

3/2 vejs magnetventil strømløs åben (NO)

3/2-way solenoid valve currentless open (NO)
- 2) 

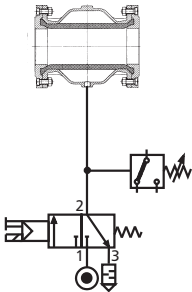

3/2 vejs magnetventil (NC) strømløs lukket med hurtigudluftningsventil

3/2-way solenoid valve (NC) normally closed with quick exhaust valve
- 3) 

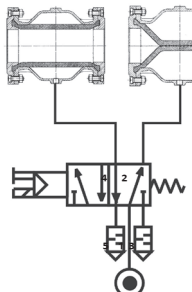

3/2 vejs magnetventil (NC) strømløs lukket med trykreducing

3/2-way solenoid valve (NC) normally closed with pressure regulator
- 4) 

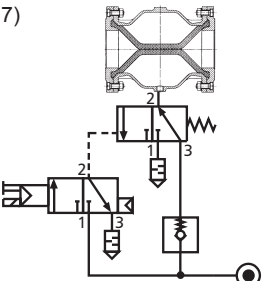

Ved sugefødning: Vakuumpumpe og bypass på tilslutning 3

Conveying by suction: Connect vacuum-pump or bypass at connection 3
- 5) 

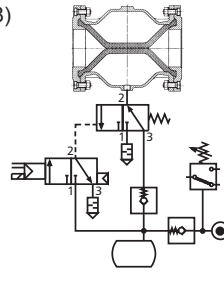

3/2 vejs magnetventil strømløs lukket (NC) med trykregulator

3/2-way solenoid valve normally closed (NC) with pressure switch
- 6) 

5/2 vejs magnetventil for vekselstyring

5/2-way solenoid valve for various regulation
- 7) 

Ved trykluft-/strømsvigt: Slangeventil forbliver lukket

For pressure power shut down: Pinch valve remains in closed position.
- 8) 

Ved trykluft-/strømsvigt: Slangeventil lukker også i åben tilstand (Luftbuffer).

For pressure power shut down: Pinch valve can close in open position (air tank).
